

Coil cars are an integral part of many pipe and steel making facilities. DynaIndustrial has experience with coil cars used in slitter lines, coil prep lines, spiral mills, ERW mills, cut to length lines and many others. Our designs focus on preventing damage to the coils and coil containment, being extremely robust and easy to maintain. We have dealt with many issues of surface scratching and lap to lap gouging and scratching. We will use this extensive experience to solve your coil car and coil handling problems.
