

DynaIndustrial's split yoke, high capacity forming rolls offer reduced bearing failures and efficient roll changes resulting in decreased maintenance costs.

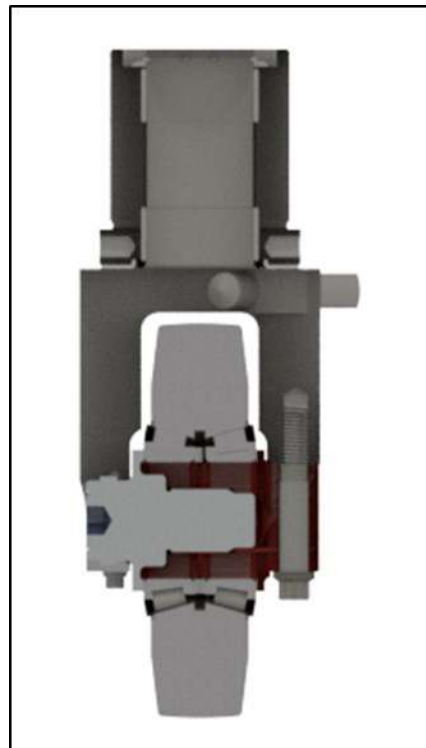

ISO View of Roller

DYNAINDUSTRIAL ADVANTAGES:

- Heavy duty bearing has 30% more capacity, significantly extending service life.
- Quick change design allows forming roll replacement in 30 minutes.
- Less scrap pipe and material waste as the strip can stay in place when the roller is replaced.
- Proven design installed on multiple Spiral Forming sections.
